Education

BSc Computer Science and Engineering

Eindhoven University of Technology (TU/e) · Eindhoven, the Netherlands · 2024-09 to 2027 (expected)

- Currently in the 3rd year, class finishing in 2027.

Secondary education: Mathematics & Informatics major with German

National Gymnasium of Natural Sciences and Mathematics "Academician Lyubomir Chakalov" · Sofia, Bulgaria · 2019-09 to 2024-05

- Mathematics & Informatics major class with German language.
- Additional specialization in Information Technologies (10th to 12th grade).
- State Baccalaureate Examination in Advanced Mathematics (20.05.2024).

Experience

Lead Programmer · Totem

`2025-09-01 to 2026-06-30 · team of ~15 · Unity, C#, Netcode for GameObjects`

An asymmetric multiplayer game, still in beta, built by a team of about 15.

- Networked pub/sub event bus, with JSON event serialization, routed per arcade machine to the sub-scene that owns it.
- Lobby and session flow: Unity Services initialization, relay integration, session create and join, player list, and asymmetric player-role assignment.
- Sub-scene "arcade machine" system: minigames running on in-world screens via render textures, with sub-scene lifecycle and validation, client-authority management, and runner and proxy object culling.
- Arcade transport: carrying a player from the 3D world into a machine's 2D sub-scene and back out again.
- The 2D player controller: a kinematic collision handler, the movement controller built on top of it, and camera follow.
- The 3D player controller: movement and the interact action.

Totem on LinkedIn

Intern · INDEAVR (Data Strategy Services department)

`2022-06 to 2022-07 · Google Analytics, JavaScript, git`

Internship at INDEAVR in Sofia, an IT outsourcing provider serving many Fortune 2000 companies.

- Made numerous client companies' sites GDPR-compliant by setting up their cookie consent.
- Helped migrate the department's wiki, working with in-house libraries, git, and Microsoft tooling.
- Got a first-hand look at company operation via presentations from each of the department's team members.
- Worked with an assigned tutor, then with the small team responsible for the wiki.

Plans

Masters in Delft with Computer Graphics; heading toward game, engine, and tooling development.

Proficiencies

Bulgarian (native) · English (C1) · German (B1)

Java

Massive projects, including a custom game engine built from scratch.

proven by: Blood of Hedon · Olympian Onslaught

C# & Unity

Professional and jam game development, plus a physical-rig digital twin.

proven by: Digital Twinning Suspension · Kill Bunny · Don't Break Glass

Python

Stochastic simulations, plotting and data analysis, plus two further university projects in Python that the course did not allow us to publish.

proven by: Digital Twinning Suspension

C++ & Vulkan

Actively learning, for the computer-graphics track in Delft.

proven by: Extensible Terrain Generation
